

PRD Summary — PilotShopping

Problem

Manual in-store total is slow; connectivity unreliable. Need fast, offline, accurate price capture.

Users

Budget-conscious Android shoppers; families tracking spend; returns and SARS documentation.

Core Requirements

Price OCR; total; budget+alerts; undo/edit; receipt photo; CSV export.

Non-functional

Offline-first; <150ms OCR-to-add; battery-friendly; accessible UI.

Metrics

Time-to-first-scan; scans/session; undo rate; alert rate; retention; export usage.
